

# Sampling per Metric Ton – LARGE Market

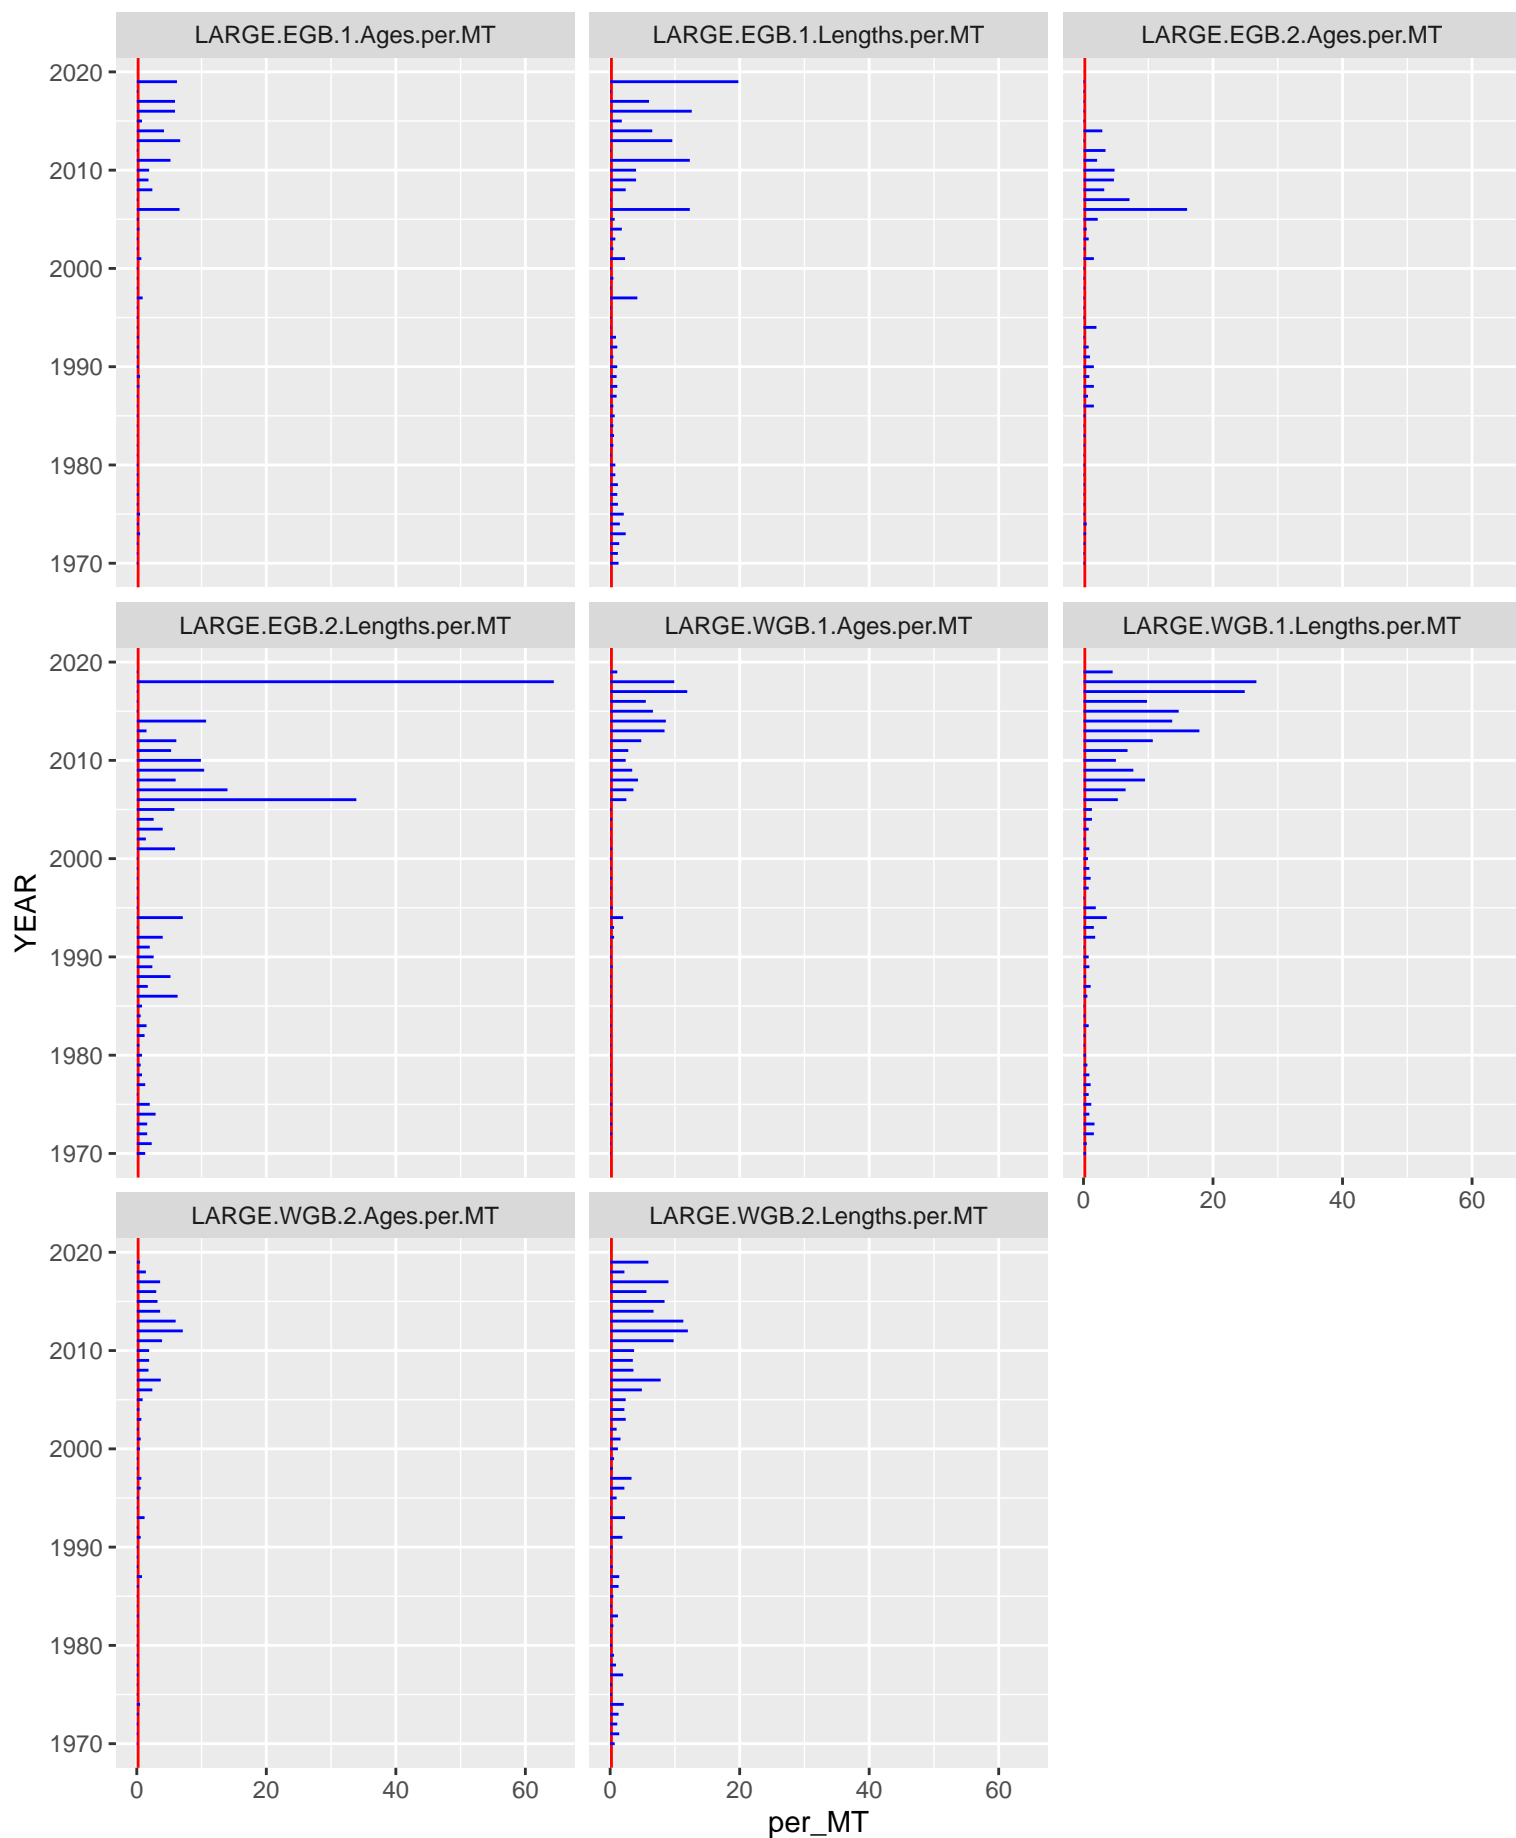

Figure 1: Number of lengths or ages sampled per MT (1000 kg) of landed catch in market category 'Large'. The vertical red line is at 0.2, reflecting the ICNAF/NAFO recommendation of 200 lengths per 1000 tons as a minimum requirement (NAFO SCS Doc. 80/VI/20). No numeric threshold for age samples was recommended.

# Sampling per Metric Ton – SCROD Market

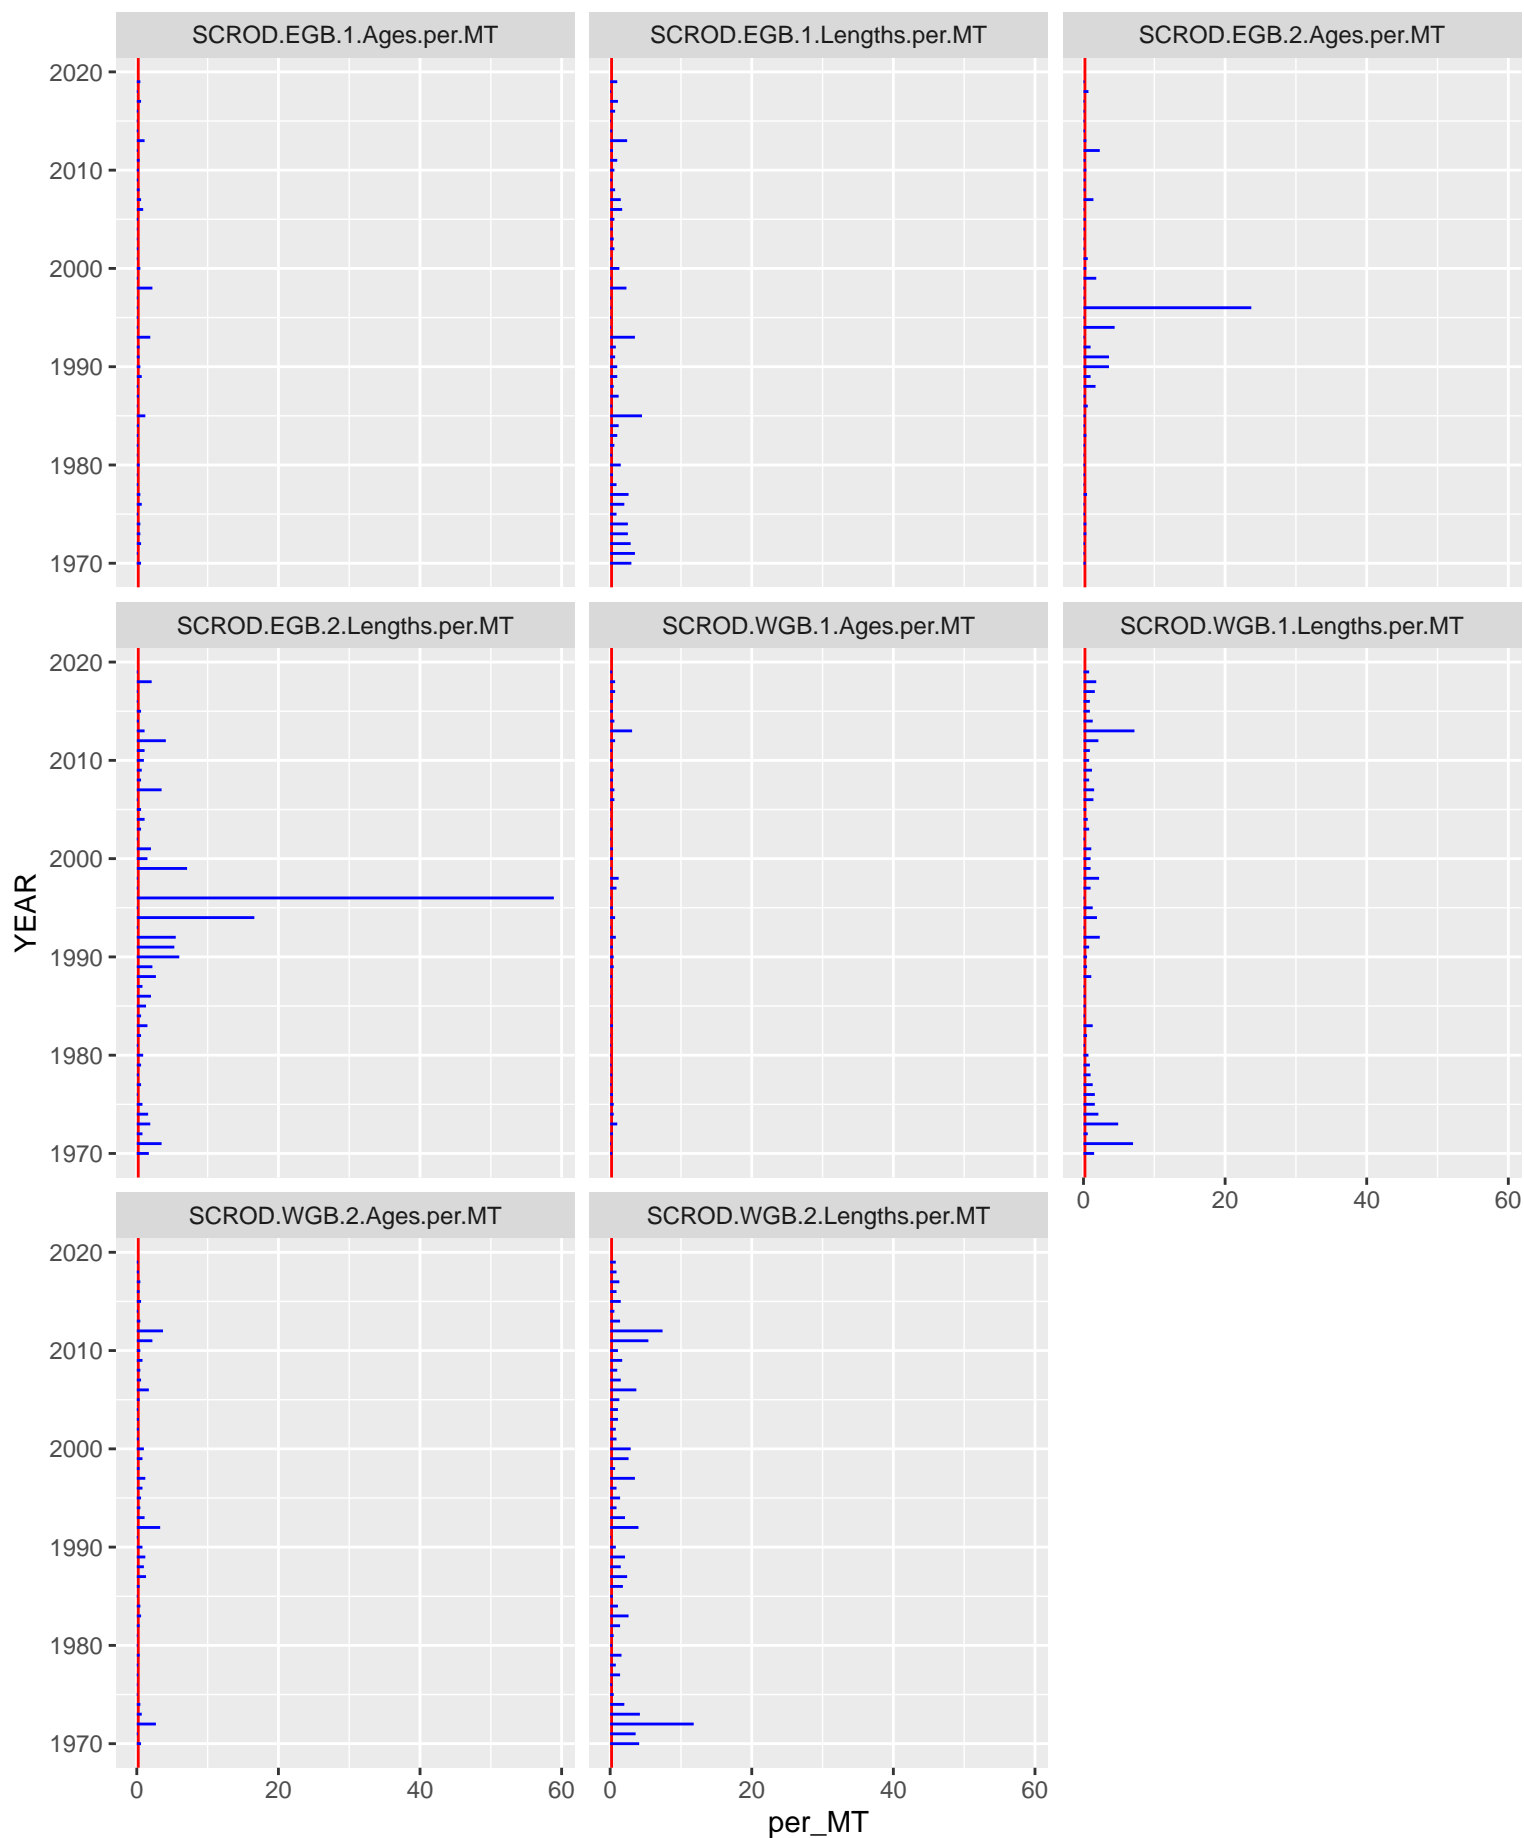

Figure 2: Number of lengths or ages sampled per MT (1000 kg) of landed catch in market category 'Scrod'. The vertical red line is at 0.2, reflecting the ICNAF/NAFO recommendation of 200 lengths per 1000 tons as a minimum requirement (NAFO SCS Doc. 80/VI/20). No numeric threshold for age samples was recommended.

# Sampling per Metric Ton – SNAPPER Market

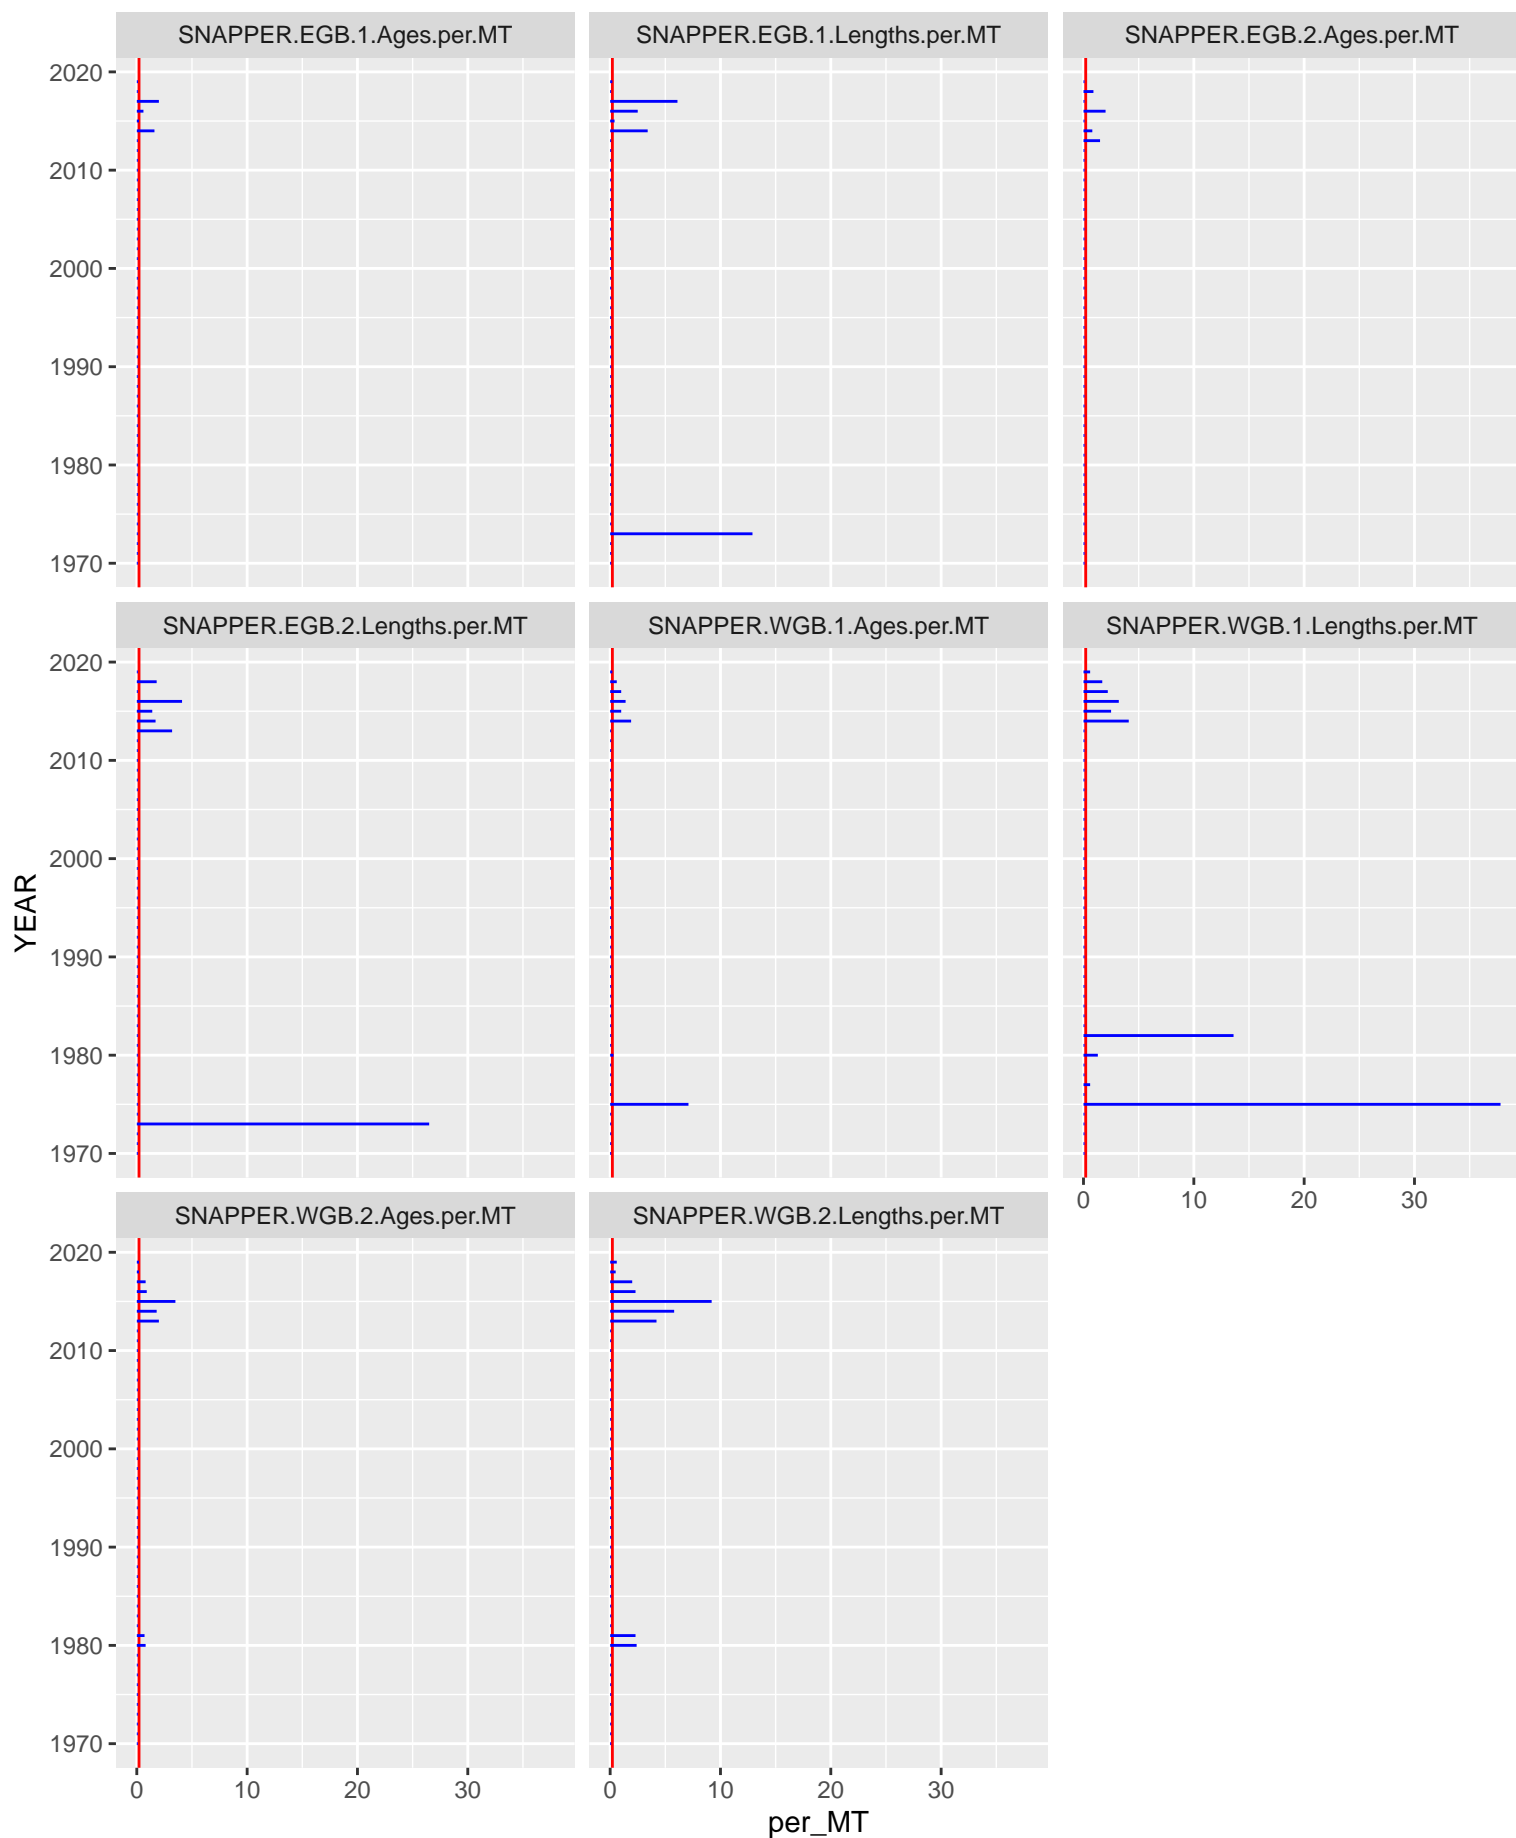

Figure 3: Number of lengths or ages sampled per MT (1000 kg) of landed catch in market category 'Snapper'. The vertical red line is at 0.2, reflecting the ICNAF/NAFO recommendation of 200 lengths per 1000 tons as a minimum requirement (NAFO SCS Doc. 80/VI/20). No numeric threshold for age samples was recommended.
